Office Action Summary	Examiner	Art Unit						
	Thanhha Pham	2813						
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address						
A SHORTENED STATUTORY PERIOD FOR REPLY WHICHEVER IS LONGER, FROM THE MAILING DATE of the may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication.  If NO period for reply is specified above, the maximum statutory period was realized to reply within the set or extended period for reply will, by statute, Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	ATE OF THIS COMMUNICATION 36(a). In no event, however, may a reply be tim till apply and will expire SIX (6) MONTHS from cause the application to become ABANDONE	N. nely filed the mailing date of this communication. D (35 U.S.C. § 133).						
Status								
1) Responsive to communication(s) filed on 03/09	9/2004.							
,	action is non-final.							
3) Since this application is in condition for allowar	nce except for formal matters, pro	osecution as to the merits is						
closed in accordance with the practice under E								
Disposition of Claims								
4) Claim(s) 1-20 is/are pending in the application.								
4a) Of the above claim(s) is/are withdraw	4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.								
6) Claim(s) is/are rejected.								
7) Claim(s) is/are objected to.								
8) Claim(s) <u>1-20</u> are subject to restriction and/or 6	election requirement.							
Application Papers								
9) The specification is objected to by the Examine	r.							
10)☐ The drawing(s) filed on is/are: a)☐ acc	epted or b) objected to by the I	Examiner.						
Applicant may not request that any objection to the	drawing(s) be held in abeyance. See	e 37 CFR 1.85(a).						
Replacement drawing sheet(s) including the correct								
11) ☐ The oath or declaration is objected to by the Ex	caminer. Note the attached Office	Action or form PTO-152.						
Priority under 35 U.S.C. § 119								
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  a) All b) Some * c) None of:  1. Certified copies of the priority documents have been received.								
2. Certified copies of the priority document	s have been received in Applicati	ion No						
3. Copies of the certified copies of the prio	rity documents have been receive	ed in this National Stage						
application from the International Bureau	· · · · · · · · · · · · · · · · · · ·

Art Unit: 2813

## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-13, drawn to a method for manufacturing a magnetic memory device, classified in class 438, subclass 3+.
  - II. Claims 15-20, drawn to a magnetic memory device, classified in class257, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product invention II can be made by another and material different process, for example, instead of forming a soft magnetic material layer selectively only on a surface of the second wiring by electroless plating process, the soft magnetic material layer being formed on only the surface of the second wiring can be formed by electrolytic plating the soft magnetic material or blanket deposition by CVD or PVD the soft magnetic material then patterning/etching to form the soft magnetic material layer only on the surface of the second wiring.

Application/Control Number: 10/796,655

Art Unit: 2813

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Page 3

- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 6. The invention I of this application contains claims directed to the following patentably distinct species of the claimed invention:
  - la. Species IA, claims 1-7, drawn to a method for manufacturing a magnetic memory device comprising removing the insulating film on a side portion of the second wiring to expose the second wiring and forming a soft magnetic material layer selectively only on a surface of the second wiring.
  - Ib. Species IB, claims 8-10, drawn to a method for manufacturing a magnetic memory device comprising wherein the second wiring is formed through a barrier layer in a trench formed in the insulating film wherein said method further comprises the steps of removing the barrier layer on a sidewall of the second wiring to form a trench so that the sidewall of the second wiring is exposed and forming a soft magnetic material layer selectively only on a surface including the sidewall of the second wiring while filling the trench.

Art Unit: 2813

Ic. Species IC, claims 11-14, drawn to a method for manufacturing a magnetic memory device comprising forming a barrier layer in a trench for forming said second wiring formed in the insulating film; forming a soft material layer on a side wall of the trench via said barrier layer and forming said second wiring in said trench via said barrier layer and said soft magnetic material layer and further comprises a step of selectively forming a soft magnetic material layer after said second wiring is formed.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

- 7. The invention II of this application contains claims directed to the following patentably distinct species of the claimed invention:
  - IIa. Species IIA, drawn a magnetic memory device structure embodiment of figure 1C or 3C
  - IIb. Species IIB, drawn to a magnetic memory device structure embodiment of figure 4D or 5E.
  - IIc. Species IIC, drawn to a magnetic memory device structure embodiment of figure 6C
  - IId. Species IID, claims 8-10, drawn to a magnetic memory device structure of embodiment of figure 7D or 8D.

Art Unit: 2813

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

9. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanhha Pham whose telephone number is (571) 272-1696. The examiner can normally be reached on Monday and Thursday 9:00AM 9:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead can be reached on (571) 272-1702. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
